Oil rig fatality identified

By Liza Bado

The Department of Labor and Employment (DOLE) has identified the cause of a fatal oil rig accident in the Philippines. The accident occurred on a construction site in the Philippines, where a worker was killed while working on an oil rig. The investigation found that the worker was not properly trained and that the employer failed to provide adequate safety measures. The DOLE is now working to prevent such accidents in the future.

Keep tax on gold

LAWMAKERS should be wary of the temptation to abolish the 30 percent tax on gold sales. The tax is a vital source of revenue for the government and should be maintained.

Editorial: The proposal to abolish the 30 percent tax on gold sales is a dangerous one. It would result in a significant loss of revenue for the government, which is already facing a severe budget deficit.

The tax on gold sales is a vital source of revenue for the government. It should be maintained to ensure the government's financial stability.

The government should not be tempted to abolish the tax on gold sales. It is a necessary source of revenue for the state.

BIR misses 10-month collection target

Compared to previous year's level, tax take up 13.4%

By [Name] | [Date]

MANILA (Inquirer.net) — The Bureau of Internal Revenue (BIR) has missed its 10-month collection target for 2008, with actual collections at P1.185 billion, or 13.4% below the target of P1.35 billion.

The BIR said that the shortfall was due to a combination of factors, including a decline in tax payments from large corporations and a slower pace of collections from small businesses.

The BIR also noted that the collection of taxes from the retail sector has been slower than expected, particularly in the areas of value-added tax (VAT) and excise tax.

Despite the shortfall, the BIR remains optimistic about its performance for the remainder of the year, citing a strong start in the first half of 2008.

The BIR is currently working to improve its collection efforts, particularly in the areas of tax enforcement and taxpayer education.

The BIR is also planning to launch a series of campaigns to encourage taxpayers to pay their taxes on time and in full.

Smugglers now control 95% of PH gold trade

By [Name] | [Date]

MANILA (Inquirer.net) — Smugglers now control 95% of the Philippines' gold trade, according to a report by the Philippine Bureau of Customs (PBC).

The PBC said that the majority of gold imports and exports are now being handled by a small number of large smuggling rings.

The PBC also noted that the smuggling of gold has become a major source of revenue for these groups, particularly in the areas of value-added tax (VAT) and excise tax.

The PBC is currently working to improve its enforcement efforts, particularly in the areas of tax collection and taxpayer education.

The PBC is also planning to launch a series of campaigns to encourage taxpayers to pay their taxes on time and in full.

The PBC is also planning to launch a series of campaigns to encourage taxpayers to pay their taxes on time and in full.

Figure 1: A schematic diagram of the experimental setup for measuring the time course of the aftereffect of a single stimulus. The diagram shows a subject viewing a screen with a stimulus (S) and a response (R). The stimulus is a light pulse of duration t_s . The response is a light pulse of duration t_r . The time interval between the stimulus and the response is t_i . The time course of the aftereffect is shown as a curve that decays from a peak value of 1.0 over time t_a .
